

CMPT 276 - AI Disclosure Form - Fall 2024

Why this survey? This disclosure form aims to *help us understand and reduce any potential risks* related to the use of AI tools in this course.

Please complete the survey **by yourself** and be **truthful**. *Using AI tools will not negatively affect your marks for the assignment/lab/etc.*

What do we mean by AI tools in this survey?

AI content generators refer to any tools that create any type of content, including (but not limited to):

- ChatGPT and all other large-scale language models;
- Stable Diffusion and other AI-based Image Generators;
- Code extensions for IDEs;
- Other tools that are capable of generating text, image, codes, or any other content for the course work. BUT, Grammarly and other grammar checkers are NOT included.

For more information on our policy, please refer to: <https://parsa-rajabl.github.io/CMPT-276/#ai-policy>

Hi, kmr21. When you submit this form, the owner will see your name and email address.

* Required

1. First Name (as appears on Canvas) *

Karl Matthew

2. Last Name (as appears on Canvas) *

Rodriguez

3. Student ID *

301576895

4. Which assignment/lab/project submission is this AI use disclosure for? *

Project submissions are included as "MX" aka Milestone X, where X is the milestone number

M2

5. How do you feel about using AI content generators in relation to your personal standards of academic integrity for this submission? * 

	Completely Acceptable	Somewhat Acceptable	Neutral	Somewhat Unacceptable	Completely Unacceptable
In my personal standard of academic integrity, using AI content generators for this submission is...	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) * 

I think that the use of AI content generators, like ChatGPT, are somewhat acceptable in this project because not all of us have too much experience with web development and so AI can be used to help teach us how to do develop certain things. It can also be used to assist in determining and fixing errors that appear in the code which then can teach you how to deal with those types of errors. The use of AI content generators shouldn't be used for the entire project because you should be trying to do it mostly by yourself to learn web development and to actually produce a project made by your team and not by AI.

7. Did you use AI tools for this submission? * 

- ☒ Yes
- ☐ No

8. For this submission, how would you rate the relative contribution made by your versus AI? * 

	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself
This submission is...	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

9. How did using AI content generators impact **your learning** for this submission? * 

	Greatly benefited my learning	Somewhat benefited my learning	Had no impact on my learning	Somewhat hindered my learning	Greatly hindered my learning
Using AI content generators for this submission...	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

10. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences) * 

The use of AI benefited my learning because it helped me to gain a deeper understanding on how to use and implement APIs into projects. AI also taught me how to solve certain errors in web development along with why those solutions work. AI also benefited my learning by teaching me how to code certain things for web applications.

11. List the name all the AI tools that you used for this submission * 

I used ChatGPT and Clipchamp's subtitle generator.

12. How confident were you in AI's responses that you received? * 

- ☐ Confident
- ☒ Somewhat confident
- ☐ Neutral
- ☐ Somewhat not confident
- ☐ Not confident

13. How did you ensure the answer you received from the AI tool was correct? * 

To ensure that the answers I received from ChatGPT were correct, I read through the response to see if it first makes sense or if anything seems wrong. I then try to understand what its saying the solution is and then I test its solution to see if it works. For the subtitles, I watched over the video to ensure the subtitles were right and corrected the few mistakes it made.

14. Did you at any point abandon using AI tools and seek other resources? Explain your answer. * 

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

At one point, ChatGPT's responses weren't very helpful in helping debug the error in my code and so I decided to instead google the problem and I was able to find a solution to the error.

15. For each of the following items, how would you rate the relative contribution made by you versus AI? * 

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Writing - Proofreading: To revise written work for grammar, typos, style, and other related items	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Writing - Text Completion: To complete sentences, paragraphs or even entire documents	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Writing - Text Ideation: To generate new ideas, concepts; and examples for writing submissions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Text analysis: To make sense of text and generate insight as to what it means	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Summary: To quickly understand large amount of text by extracting important information	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Q&A + Research: To get answers from questions and find relevant information	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Illustration/Sketching: To create visual representations of concepts and ideas such as diagrams, charts, illustrations	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Coding - Write: To generate code by AI for software implementation	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Coding - Test: To generate <u>code tests</u> by AI for software implementation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Coding - debug: To identify issues with existing code for software implementation	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Coding - explanation: To understand what a code snippet does for software implementation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other: to help any other aspects of the submission not listed above	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. * 

For the writing aspects of this project, I did this part completely on my own. I read over my writing to ensure it was grammar free and that it made sense. I also wrote the work and came up with what to write on my own. When I was searching up solutions to issues that I was facing during this project, like bugs in the code, I made sense of the solution and understood what was being said on how to fix it on my own. For finding answers to questions that I had during this project, like how to code something or how to fix an error, I sometimes asked AI how to do these things, but I mostly resolved these issues on my own. For the parts of the UI I designed, I came up with the designs by myself. I also created the data flow and model view controller diagrams on my own with help from AI. For writing the actual tests for the code, I did this on my own. I also sometimes used the AI's code solution to fix errors that I couldn't figure out how to fix, but I coded mostly everything for my parts of the project. For understanding snippets of code, I read through the code and made sense of it on my own for what the code does and why its needed. For the 'other' category, this is for using an AI to generate subtitles for the presentation video with Clipchamp's subtitle AI. The subtitles had some errors so I had to fix some of the subtitles.

17. Please provide use this space to provide any other information that you'd like to disclose (optional)
