16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I used it for problem solving. CoPilot helps with coding as it will often pick up what I am doing during the line of code, which can sometimes be wrong and requires a close watch, but it also helped prevent a handful of typos when used for words like notification and initialization when you're typing it over and over again, there were a few bugs due to mistyped words
